

AAG Bio-A

Blended Amino Acids

SAFE - EFFECTIVE - ENVIRONMENTALLY FRIENDLY

AAG Bio-A is a blended amino acid product which uses a fermentation product and not hydrolyzed soy for its sources of amino acid sources. Also included are ingredients to enhance the effectiveness of AAG Bio-A amino acids.

Use:

Can be applied dry or in a liquid, for fast response liquid is preferred.

Vegetables: 4 to 6 lbs (1.8 to 2.75 kg) per acre with multiple applications as needed.

Turf: 2 to 4 lbs (.9 to 1.8 kg) per acre with multiple applications as needed.

Hay ground & pasture 5 lbs (2.25 kg) with multiple applications as needed.

Row crop 5 to 10 lbs (2.25 to 4.5 kg).

Above are general starting levels, each crop and soil fertility are different, please consult your crop specialist for their input.
